Education

BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING FINAL YEAR (2019-2023)

Java Institute for Advanced Technology - Sri Lanka

Skills

- Java
- flutter
- react native
- Software developing (java swing application)
- Mobile Application development (Android / iso)
- Spring Boot
- php
- MySql
- Firebase

ISURU FERNANDO

Mobile Application Developer

Work Experience

SOFTWARE & ANDROID APP DEVELOPER

AlokaIt (Pvt) Ltd

2020 Oct- 2023 Oct

MOBILE APPLICATION DEVELOPER

Exon Software Solutions

2023 Aug-present

Projects

Private Class Student Management System

2021 Aug-2022 Jan

- .Developed a robust app for managing student attendance and payments in private classes. The system streamlines student records, automates attendance tracking, and manages tuition payments. It also generates detailed financial reports, providing class financial insights and simplifying administrative tasks.
- Developed in flutter & MySQL
- This is an app used in the real world

Background Call Event Handler App

2023 Aug - 2023 Aug

- This app is designed to handle phone call events in the background, even when the app is closed. Using the PhoneStateBackground plugin, it listens for incoming or outgoing call state changes. Upon detecting a call, the app triggers an HTTP POST request to a server, sending the caller's number. The app is able to function in the background due to its use of background services, ensuring data transmission even when the user is not actively using the app.
- Developed in flutter
- This is an app used in the real world

Student Final Assignment Project (Flutter & React Native)

- I assisted students in developing their final assessment projects using Flutter and React Native, integrating Firebase and MySQL for backend services. These projects involved creating mobile applications with features such as real-time data management and user authentication. I also used BLoC for efficient state management in Flutter, while handling backend functionalities with PHP and Java.

Certification

- Deep programming language knowledge
- Strong problem-solving and communication skills
- Practical knowledge of MYSQL and database concepts
- Understanding of the latest trends and their role in a commercial environment.
- Experience in object-oriented programming, developing, testing and debugging.
